

Gericke Continuous Mixer in hygienic version type GCM EC

The successful continuous GCM mixers (Gericke Continuous Mixers) are available in a hygienic design as GCM EC for use in the food and pharmaceutical industries.

The “E” stands for extractable, the “C” for cantilevered mixing shaft.

The drive and the mixing tools are constructed in such a way that they can be extracted easily. All elements can be inspected and are accessible for thorough cleaning.

The mixers are being used successfully in connection with various challenging applications.

Examples of application

- Production of baby food
- Production of diet food
- Continuous mixing of API (Active Pharmaceutical Ingredients)

Advantages

- Extremely high mixing homogeneity
- High quality of mixing process
- Construction with neither dead zones nor hollow bodies
- Seals can be dismantled
- Extractable drive and mixing tools
- Excellent accessibility for inspection and cleaning purposes
- Ideal for use together with Gericke feeders
- Tested processes with numerous references
